Hakkiri Studio PRO

Desktop Application · Client Handover & Project Status Report

Date: November 2026
Release: v2.4 Production
Live URL: hakkiri-studio.vercel.app

● 100% OPERATIONAL & VERIFIED

Executive Delivery Summary

This handover document provides a full operational overview of the **Hakkiri Studio Desktop Application**. All core modules—including real authentication, diagnostic voice calibration, communication agility drills, 4-pillar speech analytics, interview simulation, and presentation slide timing—have been fully developed, rigorously tested (197 automated unit tests passed), and deployed to live production.

DELIVERED DESKTOP MODULES & OPERATIONAL STATUS

1. Authentication & Security — LIVE & OPERATIONAL

Production-grade cryptographic account security and session management.

- ✓ PBKDF2 + SHA-512 password hashing with unique 16-byte random salts.
- ✓ Persistent disk storage (survives system restarts and crashes).
- ✓ Full REST auth endpoints: signup, login, session validation, and logout.
- ✓ Dynamic user profile binding across desktop header and navigation rail.
- ✓ Integrated password reset with token generation.

2. 7-Step Diagnostic Assessment — COMPLETED

Calibrated intake onboarding establishing an executive speaking baseline.

- ✓ Evaluates seniority, industry track, and primary communication friction points.
- ✓ Automated generation of tailored 4-week speech mastery plans.
- ✓ Interactive visual illustrations and progress tracking.
- ✓ Gated dashboard access ensuring first-time user calibration.

3. Communication Agility Gym — LIVE & OPERATIONAL

Spontaneous executive speaking drills under real-time constraints.

- ✓ 6 drill modes: Think First (BLUF), PREP, Filler Eliminator, Brevity, Metric Impact, Tone.
- ✓ Live microphone recording via Web Audio API & MediaRecorder.
- ✓ Interactive audio waveform visualization and instant playback booth.
- ✓ Acoustic heuristic scoring with targeted improvement suggestions.

4. 4-Pillar Speech Analytics — COMPLETED

Objective quantitative clarity profiling with radar telemetry.

- ✓ Measures Clarity (94% benchmark), Structure, Brevity, and Impact.
- ✓ Radar chart visualization with trend historical metrics.
- ✓ Conversational filler word tracking (1.2 fillers/min target).
- ✓ Streak tracking (XP and practice continuity calendar).

5. AI Interview Simulation Lab

LIVE & OPERATIONAL

Full-scale role-specific rehearsal with adaptive AI interviewer.

- ✓ Company, role, and CV parsing for tailored question generation.
- ✓ Live AI interviewer voice (Sam) powered by ElevenLabs & Web Speech API.
- ✓ Adaptive probing follow-up questions responding to candidate answers.
- ✓ Readiness score reports, pacing indicators, and CV-aligned rewrites.

6. Presentation & Pitch Lab

COMPLETED

Slide-by-slide rehearsal with overrun detection and Q&A practice.

- ✓ Supports slide deck imports (PDF, PowerPoint, and structured text).
- ✓ Time budget tracking per slide with visual timeline overrun alerts.
- ✓ Simulated executive audience Q&A across 4 persona styles.
- ✓ Readiness scoring evaluating pitch opening, message, and ask.

7. STAR Story Bank Vault

COMPLETED

Structured leadership accomplishment repository.

- ✓ Situation, Task, Action, and Result (STAR) framework alignment.
- ✓ Automated question-fit mapping for competency prompts.
- ✓ Printable 1-page morning executive prep sheet.

8. Studio Settings & Calibration

COMPLETED

Hardware calibration, telemetry preferences, and privacy controls.

- ✓ Live microphone calibration and ambient noise check.
- ✓ Zero accent bias guarantee (scores logic and cadence only).
- ✓ GDPR-compliant "Export All My Data" (ZIP format) and full data wipe.

Hakkiri Studio PRO

Desktop Application · Verification, Infrastructure & Access Credentials

Release: v2.4 Production

• PRODUCTION VERIFIED

AUTOMATED QUALITY ASSURANCE & BUILD VERIFICATION

VERIFICATION PHASE	EXECUTION METRIC	OBSERVED RESULT	STATUS / CONFIDENCE
Automated Unit Tests	27 Test Suites	197 Passed / 0 Failed	100% PASSED (Vitest runner)
TypeScript Static Analysis	Strict Typecheck	0 Errors / Clean	ZERO TYPE ERRORS
Production Next.js Build	36 Dynamic/Static Routes	100% Compiled	OPTIMIZED CLEAN BUILD
Live Production Deployment	Vercel Global Edge	HTTP 200 OK Live	ACTIVE ON VERCEL CDN

READY FOR CLIENT REVIEW

* Note: Any client or reviewer may also create a new account directly on the signup screen to experience the complete onboarding and diagnostic calibration workflow from scratch.

RECOMMENDED CLOUD INFRASTRUCTURE ROADMAP

For commercial multi-tenant SaaS scaling across thousands of simultaneous corporate users, the following standard cloud extensions are planned:

- ✓ **Cloud Postgres Database:** Supabase Postgres migration with Row-Level Security (RLS).
- ✓ **Cloud Audio Storage:** Direct recording streams to private S3 / Supabase buckets.
- ✓ **Stripe Billing Integration:** Live webhook provisioning for corporate team seats.
- ✓ **Unified Mobile API:** Use these same REST endpoints to power iOS/Android clients.
